EDUCATION

Purdue University

B.S. in Computer Science - Concentration in Machine Intelligence

West Lafayette, IN
2024-2028

EXPERIENCE

Lenovo Inc

AI development Intern

Morrisville, NC

July - August 2026

- Built an end-to-end synthetic enterprise knowledge-management RAG prototype with 90% accuracy from the ground truth up.
- Built a B2B price-optimization prototype that predicts quote win probability across candidate prices, increasing simulated expected contribution 12% over historical pricing using hierarchical, survival, and choice models.

Purdue STARS

IC Design Intern

West Lafayette, IN

June - August 2025

- Designed and implemented a 32-bit RISC-V CPU with I Cache and Graphing Peripherals (UART Keypad + SPI LCD Display).
- Deployed SoC using Caravel for fabrication, with final size equivalent to 5530/7680 FPGA cells and ~13K standard on taped out NEBULA III chip.

Atom Bioworks Inc

ML Research Intern

Raleigh, NC

June - August 2024

- Contributed to AptaBLE, an NSF SBIR-funded research project, by building ML pipeline tools for developing a 150M parameters protein language model-based binder classifier and generator.
- Presented at NeurIPS 2024 conference, with 4497 total accepted papers of 17941 submissions (25.8% acceptance rate).

SKILLS

- | | | |
|---------------|--------|---------|
| • Python | • Java | • C/C++ |
| • Linux | • Unix | • Git |
| • HuggingFace | • LLMs | • SQL |

PUBLICATIONS
